## Skin Care Review: Environ Skin Care

*by Monica, Glastonbury, CT USA*

I have never had such amazing results from any skincare product in my life! I have spent thousands of dollars on all different skincare products and chemical peels. I have been using Environ: Vitamin A low oil lotion, Colostrum, Alpha Gel, Mild Toner, and more. I noticed results in one week! I not only am dry with sun damage, but also get acne!!! My plastic surgeons office always thought I was a "difficult" case. No products seemed to work. Now I wake up in the morning with clear, hydrated, poreless skin. It is remarkable and I would recommend it to anyone; even those with no skin problems. Last, it is affordable!!

## Skin Care Review: Environ Skin Care

*by Sarah Meltier, Vancouver, Canada*

I have been a client of a RN in Vancouver, BC Canada who introduced me to this line. I will put in simple..WOW!! I can't beleive in the 8 months what this line has done for my skin. I use to spend alot of time in the sun. I had sun spots, wrinkles, irregular complexion and broken blood vessels. My skin has improved so much that people ask me if I had plastic surgery. Environ is simple, affordable and corrective. I'm hooked! Here's there website [www.anjieairone.com](http://www.anjieairone.com), she is an RN that work with you to get the results you want.

## Skin Care Review: Environ Rich Night Cream

*by Heidi Jae, kailua, HI usa*

I have been using Environ Rich Night Cream for 7 months and I am more than impressed with the results I am seeing. The results are not immediate but with constant use it is guaranteed that one will notice a porcelain-like surface to the skin and fine lines will disappear. It is best to use the milder Environ creams in the beginning so that the skin is able to adjust to the Retin-A. But after the first few months one can work themselves up to the richer creams with the higher concentrations of Retin-A. I have lived in a tropical and sunny environment all my life and have fair skin, and Environ has helped reduce the wear and tear of my skin from the harsh sun and my dermatologist told me that the Retin-A in the Environ creams acts as a scavenger for skin cancer. The benefits of this product are impressive!!!
